EHEIM
reeflexUV

**The UV steriliser with new
reflector technology**
Made in Germany

Effective against germs

The new UV steriliser of EHEIM

new

With EHEIM reeflexUV you can reduce the microorganisms in the water and eradicate torpidity in the water better than ever before.

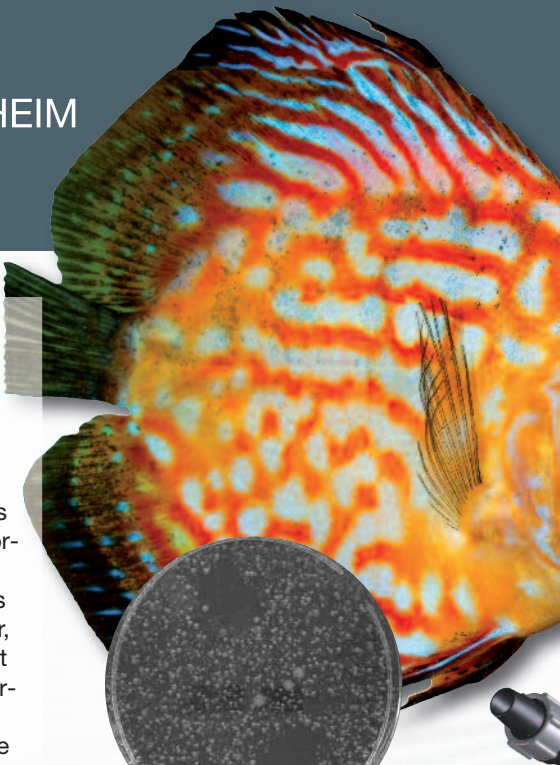

reeflexUV is another typical innovation from EHEIM: Due to the built-in reflectors the UV-C radiation, which kills off microorganisms, is significantly enhanced.

In conventional UV sterilisers the water is directed via detours past the UVC burner, in the EHEIM reeflexUV it takes the direct route - there is therefore no loss of performance.

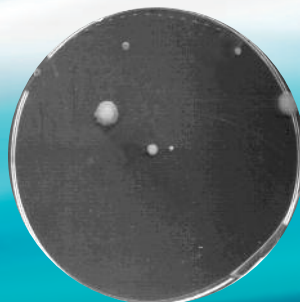

You use less energy and the performance level is 1,8 times better.

reeflexUV should be used to support the filter, in order to reduce microorganisms (germs, algae spores etc.) in the aquarium.

There are 3 models available for aquariums from 80 up to 800 Litres.

Microorganism in the aquarium without UV-steriliser

with EHEIM reeflexUV

EHEIM reeflexUV

UV steriliser with new reflector technology. High performance with low energy consumption.

- Quickly and effectively reduces the level of microorganisms in the water
- Removes cloudy water caused by algae or bacteria
- Internally fitted high gloss aluminium reflects the UV-C light and ensures highly efficient sterilization
- Excellent results with low energy consumption (1,8 times better efficiency compared to conventional UV sterilisers)
- No efficiency loss, because there is no distortion of the the water through-flow due to its special construction
- Ideal also for breeder tanks, reduces the risk of infection
- Purification bacteria living on the filter remain intact, because only floating microorganisms are captured
- Simple and safe cleaning and maintenance
- AUTO-OFF: automatic safety cut-off when changing lamp
- Easily attached using the fixing bracket (included)
- For Fresh-and Marine water

Warning: UV-C radiation can harm eyes and skin even in small doses.

Technical Data

For aquariums up to	l	80-350	300-500	400-800
Dimensions HxWxD	mm	309x106x128	383x106x149	523x106x149
Hose connection	mm	ø 12/16	ø 16/22	ø 16/22
Pressure	bar	0,8	0,8	0,8
Torpidity	l/h	400	800	1200
Reduction of germs	l/h	200	400	600
Power consumption	W	7	9	11
Art.No. (Europe)		3721210	3722210	3723210
Art.No. (UK)		3721350	3722350	3723350

Accessories included:

EHEIM UV-C-Lamp, fixing unit, ballast with power cable,
2x hose connection taps ø 12/16 mm (reeflexUV 350),
16/22 mm (reeflexUV 500 and 800).

Optional accessories

Original EHEIM replacement lamp

7 Watt	Art. 7315298
9 Watt	Art. 7315168
11 Watt	Art. 7315308

Accessories for ø 12/16 mm

Hose, 3 m	Art. 4004943
AShut-off tap	Art. 4004512

ø 16/22 mm

Hose, 3 m	Art. 4005943
AShut-off tap	Art. 4005510
